COMMENTS FROM THE CHAIR:

Co-chair Dan Brin stated that last weekend he attended the Van Nuys Neighborhood Council's retreat. Mr. Brin said he was invited because the VNNC wanted to know how we, the WHNC, accomplish all that we do. The WHNC has set the bar high with the number of agendas, meetings and Community Impact Statements completed last year.

Mr. Brin spoke about the senseless violence that has occurred in Pittsburgh, Thousand Oaks and other places and held a moment of silence for all victims of violence.

Mr. Dan Brin and Co-Chair Charlene Rothstein swore in the newest member of the West Hills Neighborhood Council Board, Zach Volet.

ANNOUNCEMENTS:

Senior Lead Officer (SLO) Kari McNamee said that reported crimes her area, the southern portion of West Hills, are still down from last year. There were zero violent crimes in the past week and property crimes are down 17% compared to last year.

Kathleen Quinn, DONE's Neighborhood Council advocate, said October was a busy month. While there will be no voting by mail at the next election, there will be curbside voting.

MOTION

Neighborhood Council Subdivision Reforms

In 2001 the first Plan for a Citywide System of Neighborhood Councils ("the Plan") was established. This document established the rules that effectuated Charter Section IX approved by Los Angeles voters that created the Neighborhood Council system. Primarily, the Plan set forth a process to certify neighborhood councils and draw their boundaries. This process took place over a period of about ten years until almost every inch of the City was covered by a Neighborhood Council.

The plan did not contain a mechanism for Neighborhood Council boundaries to change or split if the boundaries were drawn in such a way as to cover multiple disparate communities or communities that changed over time. Based on requests from neighborhood council members and neighborhood leaders who wanted an avenue to make changes to existing Neighborhood Council boundaries if those boundaries might no longer be serving their communities well.

Therefore, in 2016, City Council approved Ordinance 184,526 creating a subdivision process for Neighborhood Councils. This ordinance established a process for communities to petition to subdivide an existing neighborhood council if they felt the Council was not able to serve all of its disparate communities. If a petition was deemed complete per the requirements of the ordinance, the petition to subdivide would be put to a vote of the people of the existing Neighborhood Council and the proposed subdivided area. If both groups voted in favor of the subdivision a new Neighborhood Council would be created.

The first round of subdivisions occurred in 2017. A second round recently finished in 2018. Over these two rounds of subdivisions, a total of five subdivision elections were held with three affirmative votes for subdivision and two in the negative. This process has demonstrated some clear issues in the subdivision process as currently enacted that have generated unnecessary discord in neighborhoods and used up more city staff time than is beneficial for the overall Neighborhood Council system.

The Board of Neighborhood Commissioners reviewed the subdivision process after the elections in 2017 and developed a series of recommendations for improvements in the process, encapsulated in their letter set out in Council File 12-1681-S1.

Based on this letter, the lessons learned from the subdivision elections held in 2018, and the amount of staff time needed for subdivision elections, some reform to the subdivision process is clearly needed. However, it is clear based on the number of subdivision applications that have been received, that in order to allow communities to have self-determination, a subdivision process is still needed.

I THEREFORE MOVE that the Department of Neighborhood Empowerment be INSTRUCTED to:

- Hold subdivision elections no more frequently than once every four years.
- Hold the next subdivision elections in 2022 or later, to give time for the new subdivided Neighborhood Councils to become established and provide the department time to draft

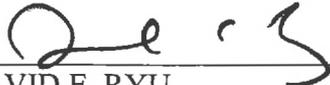

ORIGINAL

AUG 14 2018

and adopt these regulations and other ordinance changes spelled out in Council File 12-1681-S1.

- Hold no more than three subdivision elections per subdivision election cycle. If more than three petitions are submitted, the three fully completed petitions with the largest number of residents, based on the latest data available from the American Community Survey of the US Census or related government data set if the American Community Survey is no longer available, shall be accepted.
- Not accept subdivision applications that include boundaries within a Neighborhood Council that has already had a subdivision election, whether successful or unsuccessful, until the third subdivision cycle after any previous subdivision election.
- Not accept subdivision applications that encompass less than 10,000 residents, based on the latest data available from the American Community Survey of the US Census.
- Not accept subdivision applications that encompass more than 50% of the residents of the existing Neighborhood Council (or 50% of the Neighborhood Council which is losing the most residents to the proposed subdivision if more than one Neighborhood Council is being proposed for subdivision), based on the latest data available from the American Community Survey of the US Census.
- Require subdivision petitions to contain at least 500 signatures from stakeholders of the proposed Neighborhood Council boundaries and that no more than 10% of signatures gathered can come from any one building or address.
- Require subdivision formation committees that have submitted a subdivision application to sit down with board representatives from the Neighborhood Council they seek to subdivide in at least one mediation session moderated by the Department. The mediation should include invitations to any Council Offices with overlapping boundaries and the Neighborhood Commissioner for the area. The mediation should endeavor to determine if the existing Neighborhood Council and the Formation Committee can agree to bylaws changes at the existing Neighborhood Council that satisfy enough of the Formation Committee's concerns in order for the subdivision application to be rescinded. If a mediated agreement cannot be achieved, the application could move towards a public hearing and review by the Board of Neighborhood Commissioners as stipulated in the ordinance.
- Publish a subdivision policy encapsulating these and any other relevant requirements.

ATTACHMENT: FACTS AND FINDINGS

The number of disruptions at Council and Committee meeting have recently increased. Despite enforcement of the Council's current rules, some members of the public repeatedly disrupt multiple meetings on the same day and often multiple days each week. People who repeatedly disrupt the orderly conduct of public meetings deter other members of the public from attending public meetings and taking the opportunity provided under the Brown Act to provide comment to their elected representatives.

In order to prevent repeated and frequent disruptions of public meetings and increase public comment overall, the Council should amend the Council and Committee rules in the most narrowly tailored manner that will curb the actions of people who chronically disrupt Council and committee meetings. The following facts and findings are pertinent to the rule changes proposed in this Motion:

- The State legislature enacted the Brown Act in order to increase public participation at meetings of legislative bodies throughout the State of California.
- The Brown Act accomplishes that purpose by requiring legislative bodies to create at their public meetings limited public fora for comment by members of the public.
- The Brown Act specifically requires a legislative body at each of its meetings to hold a public hearing affording members of the public the opportunity to address the legislative body on any agenda item that has not already received public comment.
- The Brown Act additionally requires a legislative body at each of its regular meetings to hear general comment affording members of the public the opportunity to address the legislative body on any matter within the body's subject matter jurisdiction.
- The Rules of the Los Angeles City Council implement these Brown Act requirements at City Council and Committee meetings.
- It is the Brown Act, and not the First Amendment to the United States Constitution or the Free Speech Clause of the California Constitution, that requires legislative bodies in California to create limited public fora for public comment.
- Consistent with the First Amendment and Free Speech Clause, the Council may enforce content-based regulations, including rules of decorum, as long as the regulations are view-point neutral and reasonable in light of the purpose served by the Brown Act fora.
- The Council therefore may and does, for example, require public speech be non-repetitive and germane to an agenda item or, during general public comment, to a matter within the subject matter jurisdiction of the City or Committee.
- The Brown Act, the First Amendment, and the Free Speech Clause do not permit a member of the public to disrupt a meeting of a legislative body or impair the reasonable maintenance of public safety.
- A presiding officer at a Council or Committee meeting may order removed a member of the public who actually disrupts the meeting.
- Individuals who abuse certain rights may forfeit them for a period of time.
- Individuals ordered removed from Council or Committee meetings may view and/or listen to the meetings live, while the meeting is occurring, or at a later time via the City's website; may listen to the meetings live while the meeting is occurring from any telephone; and may submit written comments, which become part of the public record, in advance, during, or after the meetings via the City's website, via the U.S. mail, or in person at the office of the City Clerk.

MOTION

Neighborhood Council Subdivision Reforms

In 2001 the first Plan for a Citywide System of Neighborhood Councils (“the Plan”) was established. This document established the rules that effectuated Charter Section IX approved by Los Angeles voters that created the Neighborhood Council system. Primarily, the Plan set forth a process to certify neighborhood councils and draw their boundaries. This process took place over a period of about ten years until almost every inch of the City was covered by a Neighborhood Council.

The plan did not contain a mechanism for Neighborhood Council boundaries to change or split if the boundaries were drawn in such a way as to cover multiple disparate communities or communities that changed over time. Based on requests from neighborhood council members and neighborhood leaders who wanted an avenue to make changes to existing Neighborhood Council boundaries if those boundaries might no longer be serving their communities well.

Therefore, in 2016, City Council approved Ordinance 184,526 creating a subdivision process for Neighborhood Councils. This ordinance established a process for communities to petition to subdivide an existing neighborhood council if they felt the Council was not able to serve all of its disparate communities. If a petition was deemed complete per the requirements of the ordinance, the petition to subdivide would be put to a vote of the people of the existing Neighborhood Council and the proposed subdivided area. If both groups voted in favor of the subdivision a new Neighborhood Council would be created.

The first round of subdivisions occurred in 2017. A second round recently finished in 2018. Over these two rounds of subdivisions, a total of five subdivision elections were held with three affirmative votes for subdivision and two in the negative. This process has demonstrated some clear issues in the subdivision process as currently enacted that have generated unnecessary discord in neighborhoods and used up more city staff time than is beneficial for the overall Neighborhood Council system.

The Board of Neighborhood Commissioners reviewed the subdivision process after the elections in 2017 and developed a series of recommendations for improvements in the process, encapsulated in their letter set out in Council File 12-1681-S1.

Based on this letter, the lessons learned from the subdivision elections held in 2018, and the amount of staff time needed for subdivision elections, some reform to the subdivision process is clearly needed. However, it is clear based on the number of subdivision applications that have been received, that in order to allow communities to have self-determination, a subdivision process is still needed.

I THEREFORE MOVE that the Department of Neighborhood Empowerment be INSTRUCTED to:

- Hold subdivision elections no more frequently than once every four years.
- Hold the next subdivision elections in 2022 or later, to give time for the new subdivided Neighborhood Councils to become established and provide the department time to draft

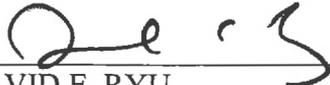

ORIGINAL

AUG 14 2018

and adopt these regulations and other ordinance changes spelled out in Council File 12-1681-S1.

- Hold no more than three subdivision elections per subdivision election cycle. If more than three petitions are submitted, the three fully completed petitions with the largest number of residents, based on the latest data available from the American Community Survey of the US Census or related government data set if the American Community Survey is no longer available, shall be accepted.
- Not accept subdivision applications that include boundaries within a Neighborhood Council that has already had a subdivision election, whether successful or unsuccessful, until the third subdivision cycle after any previous subdivision election.
- Not accept subdivision applications that encompass less than 10,000 residents, based on the latest data available from the American Community Survey of the US Census.
- Not accept subdivision applications that encompass more than 50% of the residents of the existing Neighborhood Council (or 50% of the Neighborhood Council which is losing the most residents to the proposed subdivision if more than one Neighborhood Council is being proposed for subdivision), based on the latest data available from the American Community Survey of the US Census.
- Require subdivision petitions to contain at least 500 signatures from stakeholders of the proposed Neighborhood Council boundaries and that no more than 10% of signatures gathered can come from any one building or address.
- Require subdivision formation committees that have submitted a subdivision application to sit down with board representatives from the Neighborhood Council they seek to subdivide in at least one mediation session moderated by the Department. The mediation should include invitations to any Council Offices with overlapping boundaries and the Neighborhood Commissioner for the area. The mediation should endeavor to determine if the existing Neighborhood Council and the Formation Committee can agree to bylaws changes at the existing Neighborhood Council that satisfy enough of the Formation Committee's concerns in order for the subdivision application to be rescinded. If a mediated agreement cannot be achieved, the application could move towards a public hearing and review by the Board of Neighborhood Commissioners as stipulated in the ordinance.
- Publish a subdivision policy encapsulating these and any other relevant requirements.

Agenda Item 18-0124

MOTION

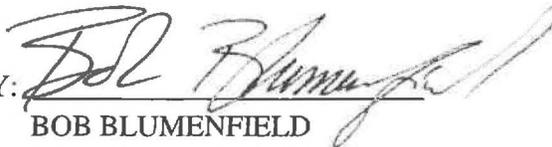

In the 1930s, the City Council took various actions through ordinance to withdraw hundreds of streets from public use. In reviewing one such ordinance, the Bureau of Engineering (BOE) identified 525 street segments removed from public use, 335 of which are within Council District 3. Many of the streets previously removed from public use require repair and maintenance and it is not known how many were constructed in accordance with current City street standards. Many of the withdrawn streets are residential and are traversed on a regular basis.

The withdrawal ordinances state that the City may return a street to public use when it is determined that a street is safe and passable. For the most part, the City has not reviewed and rated streets withdrawn from public use. Since the adoption of the withdrawal ordinances, the City Council has received intermittent requests to reinstate individual streets to public use. Reinstatement requests have been addressed in a piecemeal fashion, with BOE and the Bureau of Street Services (BSS) investigating individual streets as requests are received.

In response to a 2014 request, BOE and BSS indicated that the work associated with reinstatement requests is time consuming and is not a budgeted program. The City needs to assess the condition of all streets removed from public use and determine the actions and resources necessary to reinstate those streets.

I THEREFORE MOVE that the Department of Public Works be instructed to report in 90 days with a comprehensive list of all streets which have been removed from public use by ordinance, including the Council District in which such streets are located.

I FURTHER MOVE that the Department of Public Works be instructed to report in 90 days on the current procedures for processing street reinstatement requests, the standards used to determine whether a street can be reinstated, the resources necessary to conduct a comprehensive assessment of all remaining streets withdrawn from public use and cost estimates to repair such streets which do not meet current City standards, alternative approaches to accepting streets which do not meet current City standards, and the identification of potential funding sources for this work. A comprehensive assessment of the streets withdrawn from public use should include a determination of the current condition and lane miles of all streets withdrawn from public use, and work required to bring withdrawn streets up to current City standards and be accepted into the City street system.
