The Senate Appropriations Committee  
VOTES ON SB79

### WHAT IS SB79?

- SB79 imposes unnecessary higher-density development on single-family and affordable multi-family neighborhoods.
- SB79 targets stable residential areas rather than along our existing transit corridors.
- SB79 would undermine local housing costs, risk state sanctions, escalate land costs, push out long-time residents, increase utility fees—changes that will forever affect our cherished communities.
